

Defensive Barriers - Rapid Deployment RAID

HESCO

The HESCO® RAID™ system permits the loading of preconnected lengths of MIL™ units directly into a specially modified ISO shipping container. This method provides greatly increased load-space efficiency: RAID 7 provides 333m of wall in a single box, as opposed to the 166m achieved when loading palletized MIL 7 into a similar container. In a single, inventive step, this has the potential to take up to 50% of traffic out of the force protection supply convoy and completely eliminate the need for secondary packaging material.

RAID 10 and 12 provide the same deployment capability as RAID 7, but supplied with an overall shipped weight limited to 10 tonnes, allowing RAID to be used even when MHE load capacity is limited. RAID 7 is also available in 237m length, providing an overall shipped weight limited to 10 tonnes. All RAID containers allow swift deployment of any number of units, either standard or recoverable, ready for filling. RAID units break naturally into 5-cell lengths, with the removal of two pins - pull out as many or as few units as required. For longer walls, leave the pins in place and hitch up a suitable towing vehicle; within minutes, you can deploy up to 333m of RAID 7, 224m of RAID 10 and 321m of RAID 12, using only half the manpower needed to deploy the same amount of conventionally palletized MIL units.

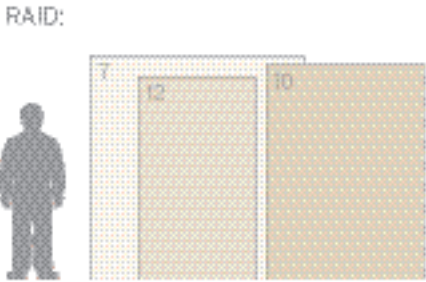

Whether used as a secure storage system for MIL units or a practical 'magazine' for fast, one-off deployment along straight or curved boundaries, RAID is the next generation of force protection.

For more information about Hesco's products and RAID, contact us direct or visit our website at: www.hesco.com

The product featured in this publication comes with a 2 year warranty, subject to Hesco's terms and conditions.

Specially modified ISO container

Pre-connected lengths of MIL units

Defensive Barriers

Product	Height	Width	Length
Rapid Deployment - Standard			
RAID 7 H*	87" (2.21m)	84" (2.13m)	1092' (333m)
RAID 7	87" (2.21m)	84" (2.13m)	777' (237m)
RAID 10	87" (2.21m)	60" (1.52m)	735' (224m)
RAID 12	84" (2.13m)	42" (1.06m)	1053' (321m)
Rapid Deployment - Recoverable			
RAID 7 RH*	87" (2.21m)	84" (2.13m)	1092' (333m)
RAID 7 R	87" (2.21m)	84" (2.13m)	777' (237m)
RAID 10 R	87" (2.21m)	60" (1.52m)	735' (224m)
RAID 12 R	84" (2.13m)	42" (1.06m)	1053' (321m)

* RAID 7 H and RAID 7 RH is the heavy version of RAID 7 with a shipping weight of 14 tonnes (31,000lbs).

All HESCO® products have a typical design life of up to 5 years depending on atmospheric environment.
